Part 1 of 2 will correlate with NSR permit R13-2379D and include the operating sources that are associated with Coating Line #1. Part 2 of 2 will correlate with NSR permit R13-3265 and include the operating sources that are associated with Coating Line #2.

Title V Program Applicability Basis

With the proposed changes associated with this modification, this facility maintains the potential to emit 100.76 tons per year of NO_x. Due to this facility's potential to emit 100 tons per year of criteria pollutant,

Jupiter Aluminum Corporation is required to have an operating permit pursuant to Title V of the Federal Clean Air Act as amended and 45CSR30. The facility was a major source of HAPs at the first compliance date of 40 CFR 63, Subpart SSSS and is therefore subject to this MACT because of once in, always in.

Legal and Factual Basis for Permit Conditions

The State and Federally-enforceable conditions of the Title V Operating Permits are based upon the requirements of the State of West Virginia Operating Permit Rule 45CSR30 for the purposes of Title V of the Federal Clean Air Act and the underlying applicable requirements in other state and federal rules.

The modification to this facility has been found to be subject to the following applicable rules:

Federal and State:	45CSR13 45CSR30	NSR Permits Operating permit requirement.
State Only:	N/A	

Each State and Federally-enforceable condition of the Title V Operating Permit references the specific relevant requirements of 45CSR30 or the applicable requirement upon which it is based. Any condition of the Title V permit that is enforceable by the State but is not Federally-enforceable is identified in the Title V permit as such.

The Secretary's authority to require standards under 40 C.F.R. Part 60 (NSPS), 40 C.F.R. Part 61 (NESHAPs), and 40 C.F.R. Part 63 (NESHAPs MACT) is provided in West Virginia Code §§ 22-5-1 *et seq.*, 45CSR16, 45CSR34 and 45CSR30.
